RELEVANT EXPERIENCE:

DevDogs / Google DGC: UGA, *Open-source Frontend Developer*, Athens, GA

Oct. 2024 - Present

- Aided the development of a web app that generates optimized course schedules for UGA students by creating several frontend features using Next.js & Tailwind CSS such as “Recommended Courses” and “Create Schedule” sections as a top 15 open-source contributor amongst 60+ team members
- Coordinated with the UI/UX & Backend teams by providing feedback on the user interface and connecting backend endpoints to display accurate data
- Assisted new onboarding members of the frontend team by introducing the tools we use and their functionality

Game Builder's Club, *Backend Developer and UI Designer*, Athens, GA

Sept. 2023 - Present

- Implemented numerous backend game mechanics & frontend UI functionality in Unity using C#, which ultimately helped produce 3+ fully released indie games
- Designed more than 30+ UI components adapted in various styles in Photoshop to create easy interactivity with the player and to display essential information
- Adapted to learning new skills (Unity in C#) as a former amateur in game development through determination

CrysalisBio, *Web Developer*, Columbus, GA

Mar. 2025

- Modernized several pages (such as the home, news, and careers page) of the website for CrysalisBio, a bioprocess technology company, through Squarespace using HTML & CSS
- Effectively worked with a company client and accepted constructive feedback to maximize the quality of the webpage

PROJECTS:

AlbumPlanner, *Next.js Full-Stack Web App*

July 2025 - Present

- Implemented a web application that allows logged in users to search & save albums using Next.js and Tailwind CSS
- Designed wireframes/mockups early on in Figma, leading to a smoother development process with a clear prototype to follow
- Utilized the Spotify API through a backend endpoint to create an interactive search feature for users to find albums
- Set up authentication using NextAuth to ensure secure connection with a user and their own saved albums

What The Chuck Game, *Unity Game*

Sept. 2024 - Dec. 2024

- Spearheaded the development for the backend player functionality in Unity using C#, resulting in functional player abilities and player interactivity with the game environment
- Supported deployment to Steam and Itch.io for over 200+ users while working alongside 10+ other programmers and artists
- Designed 15+ vital UI elements (such as the main logo, play button, game over screen, etc) throughout development

Game Information Searcher, *JavaFX Software Application*

Apr. 2024 - May 2024

- Created a tool that allows users to search for 300+ PC games through preferred using JavaFX, which spotlight new games/interests for users in 5+ currencies to view
- Utilized external RESTful JSON APIs accessed by an HTTP client to display the information

LEADERSHIP:

Association of Computing Machinery, *Marketing Chair*, Columbus, GA

May 2025 - Present

- Promoted technical workshops and company speakers at ACM meetings by designing visually-appealing graphics through Photoshop that is viewed by over +1,000 people per week
- Frequently advertised across Instagram, LinkedIn, and email to foster growing participation for future ACM meetings
