EDUCATION:

University of Georgia

Aug. 2023 - May 2027

- **GPA:** 3.81 / 4.00
- **Major:** Bachelor of Science in Computer Science
- **Coursework:** Data Structures, Algorithms, Software Development, Theory of Computing, Discrete Mathematics

SKILLS:

- **Programming Languages & Libraries:** Java, C, C#, HTML, CSS, Javascript, Typescript, React
- **Tools:** Github, VS Code, Terminal, Emacs, Eclipse IDE, Adobe Photoshop, Adobe Illustrator, Adobe Premiere Pro
- Experience in graphic design (7+yrs.), video editing (4+yrs.), logo design (3+yrs.)

RELEVANT EXPERIENCE:

DevDogs, *Frontend Programmer*, Athens, GA

Oct. 2024 - Present

- Worked with 40+ team members to develop large-scale yearly software projects aimed at improving the community at UGA
- Developed several frontend components (such as a recommended course tab and a reusable card element) for the “UGA Optimized Schedule Builder”, a resourceful web application that provides students an effective method for generating quality course schedules
- Utilized Next.js and Tailwind CSS efficiently interacting with group leaders for feedback to maximize the quality of my work

Game Builder's Club, *Programmer and UI Designer*, Athens, GA

Sept. 2023 - Present

- Collaborated in several teams of 5-10 members each semester to develop unique games open to anyone to play
- Primarily programmed in Unity using C# and frequently coordinating with other programmers through GitHub
- Gained experience with implementing UI/UX design by providing numerous UI assets and integrating functionality

Robotics, *Lead of Media*, Columbus, GA

Sept. 2021 - Aug. 2023

- Participated in a team of 35+ members involved in competitive tournaments at the regional and international levels
- **Programmer:** Helped code certain aspects of the robots such as a climbing mechanism and vision detection using Java & EasyOpenCV library for FIRST Robotics
- **Graphic Designer:** Redesigned numerous team designs (such as logos, shirts, and the team flag), customized a design for the team's cargo trailer, and developed multiple video thumbnails to professionally present our team
- Created a program called “Safety Tip of the Month” that posted videos to spread awareness of important safety guidelines in robotics

PROJECTS:

What The Chuck Game

Sept. 2024 - Dec. 2024

- Worked alongside programmers and artists (10+) to develop a local multiplayer game
- Assisted by programming various game mechanics (such as player respawns and dash ability) in C#
- Designed vital UI elements (play button, settings panel, game over screen, etc) as well as the main logo

Portfolio Website (<https://sidhantdash.github.io/>)

Jul. 2024 - Sept. 2024

- Developed a personal website that displays my programming projects, graphic/logo designs, and resume using HTML and CSS

Game Information Searcher

Apr. 2024 - May 2024

- Created a JavaFX application allowing users to search for PC games in 5+ different categories
- Helps users discover new games/interests that are searchable by multiple filters (such as by low price or by current deals)
- Conforms to users' preferences by allowing the option to convert prices to 5+ other currencies of their choice
- Utilizes external RESTful JSON APIs accessed by an HTTP client to display the information

Chase the Fun Game

Jan. 2024 - Apr. 2024

- A 2D top-down space game created by a team of programmers (4+), artists (2+), and musicians (2+)
- Mainly contributed as a programmer by implementing the player and enemy movement in C#
- Designed most of the user interface such as the scoring system, pause menu, bottom buttons, and more

COMMUNITY INVOLVEMENT:

Feed the Valley Bank, *Volunteer*, Columbus, GA

Jul. 2019 - Feb. 2023

- Packaged cans, beverages, and other goods as well as handled trash and disposables (20+ hours)
- Participated in local food drives by handing out confined goods to local communities (10+ hours)

First Lego League Robotics at Blackmon Road Middle School, *Volunteer*, Columbus, GA

Sept. 2022 - Dec. 2022

- Mentored 9+ students in a middle school robotics program every Wednesday for 14+ weeks
- Helped reinvigorate a new robotics team after it previously shut down earlier due to COVID-19
- Led the team and introduced the basics of the FIRST Lego League STEM program

Care for Special People Robotics program, *Volunteer*, Columbus, GA

Jan. 2022 - Apr. 2022

- Dedicated to developing/donating goods for people with disabilities
- Made fleece blankets for Project Linus, a nonprofit organization dedicated to children in need
